### *Allowable Subject Matter*

2. Claims 1-6 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest either alone or in combination thereof:

two position sensors;  
two origin sensors, and  
a controller for, responsive to detection signals from said two position sensors and the two origin sensors, controlling the linear motors to thereby perform a position control of the two moving bodies,

wherein the controller has a yaw axis rotation control function of individually controlling the linear motors to thereby rotate the beam about a yaw rotation axis perpendicular to the one axis direction and, based on the yaw axis rotation control function, the controller performs, at the time of starting the stage device, a control of maintaining an orthogonality of the beam with respect to the guide member within a predetermined range even when the orthogonality of the beam with respect to the guide member changes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
